

AluWood External Door

- Made to measure in a choice of design and to any size* with the option of a complimentary fanlight and/or sidelights, to maximise design flexibility.
- Manufactured from selected redwood, hardwood or engineered timber, clad externally with mill finish or polyester powder coated extruded aluminium, connected by purpose designed thermally broken nylon clips, therefore ensuring ultimate quality.
- All timber sourced from properly managed sustainable sources to help protect the environment and, since aluminium is recyclable, doors contain a minimum amount of embodied energy.
- Finished inside with a clear or colour factory coating, to ensure complete and equal cover of the finish and outside with any RAL colour available, for ultimate choice and enhanced aesthetic appeal.
- One piece closed cell foam gasket to give extra cover and improved weather sealing.
- Door factory pre-hung on three butt hinges capable of carrying a load of 100kg, with extra hinges used to accommodate greater weights, if required.
- Factory fitted multi-point locking mechanism featuring a latched deadlock and two hook bolts complete with euro cylinder lock and lever handles.
- Single doors available opening in or out whilst French doors are only available opening out, all with factory fitted rebated low threshold as standard.
- Available double or triple glazed, providing excellent U-values, with optional aluminium faced insulated panels also available. Glass and/or panels are factory fitted with security glazing tape.
- Optional letterbox, door viewer, numerals, security chain and trickle ventilation available.
- Each individual door is manufactured to order and to our ultimate quality in strict accordance with ISO 9001-2008 standards.

**Subject to standard industry design parameters.*
