ALUMINIUM CLAD TIMBER WINDOWS AND DOORS
TOUGH ON THE OUTSIDE, WARM ON THE INSIDE

THE BEST OF BOTH WORLDS

AluWood - The right choice for your next windows and doors

Buying windows and doors is an important long-term investment for your home and you'll want the best system for both style and performance.

The AluWood aluminium clad timber window and door system combines the modern look and superior qualities of aluminium on the outside, with the cosy, homely feel and warmth of timber on the inside.

The two materials combined create a sophisticated low-maintenance system, that offers plenty of design choice, great thermal efficiency and tough security.

Fully tested and with high security standards, you can count on the performance of AluWood to keep your home secure, lower your energy bills and look fantastic.

THE BENEFITS OF ALUWOOD TIMBER WINDOWS AND DOORS

INSULATION

You can choose from a number of different woods including hardwoods and laminated pine.

The AluWood composite window and door system gives your home the benefits of both timber and aluminium. See here how combining the use of both materials can help you save money and style your home how you want.

WINDOW STYLES

AluWood was one of the first manufacturers to bring composite windows to the market.

With contemporary and modern architecture in mind, its system is designed for lots of window styles so you can get the best window for your home.

Whether you live in a rural cottage, a suburban house or an inner city apartment, there's an AluWood window for you.

AluWood windows are available in:

FLUSH TOP-SWING
FULLY REVERSIBLE

FLUSH TOP/SIDE-
HUNG CASEMENTS

FIXED LIGHTS WITH INTERNAL
OR EXTERNAL BEADS

The flush sash style of AluWood windows gives clean, modern lines for a fantastic finish. You can choose aluminium in any colour to suit your property.

FINISHING TOUCHES

AluWood windows and doors are the ideal design solution for any style of home because there is so much design choice. You can contrast, co-ordinate or even clash colours to create the perfect finish for your home. The exterior aluminium frame can be powder coated in any RAL colour or anodised for a more durable finish.

The timber interiors can be sprayed in a choice of finishes to suit your interior décor. White and clear lacquer finishes are really popular, but there's a range of colours you can choose from too.

Talk to your installer about the hardware available to complete the look on your project.

* Dual colour options available.

ENERGY EFFICIENCY

AluWood windows and doors are designed with the latest window and door technology to meet the demand for energy efficient glazing. AluWood can come with double or triple glazed units to 36mm to help trap the heat inside your home and stop it from

escaping to the outside. With the aluminium on the outside and the timber on the inside, your windows and doors will not only help you save money on your energy bills but also give you the contemporary designed window or door you're looking for.

SECURITY

Tested to PAS 24 standard, AluWood windows benefit from high-security multi-point locking so you can be sure that your windows are safe and secure. There's also a night vent option for extra ventilation

whilst maintaining security. Doors have a multi-point locking mechanism with a latched deadlock for extra security with a top-quality cylinder lock to prevent lock-bumping, drilling and picking.
